

Tips on how to Motivate and Migrate your Staff to take up Online Learning

✓ **Be an Online 'Role Model'**

Sign up to our Online School, take a tour, and enrol in one of our short courses yourself.

✓ **Allow a regular time each week**

This doesn't *have* to be a large chunk of time, it could just be 15-30 minutes a week; this is still enough to help learning progression as it is tracked online.

✓ **Provide the right equipment**

All of our courses have audio visual presentations so head phones will allow more focused study time.

✓ **Study buddies**

Buddy-up colleagues who are studying the same course and allow time for them to meet and discuss. This can also be done with those who are technical able and those who are technically challenged!
